## **Title I Event Information**

### October Family Nights

Families are invited to join us to learn more about what students will be learning in math and language arts this year. A light dinner will be provided. Adults will participate in two learning sessions, one focusing on reading/language arts, and one focusing on math. Students will participate in separate activities focusing on our first success factor: Kindness. Siblings are welcome and childcare will be provided.

### Mental Health/Online Safety Night

Join us to explore mental health related topics including: challenging behavior, anxiety, suicide prevention, and online safety. We will have multiple presenters to choose from.

### Kindergarten Learning Parties

Families of incoming kindergarten students are invited to a series of 4 parent/child workshops that will focus on the social and emotional development of our incoming kindergarten students. Parents will learn strategies for supporting their children's social and emotional abilities, which will help students succeed academically.

### STEM Night

Join us for one of our most popular events of the year! We will partner with the PTA to provide an evening of science, technology, engineering, and math. There will be lots of hands-on activities for students.

### Celebration of Learning/Summer Kickoff

Our last family event of the year is a kick-off to summer! Families will learn strategies to support continued learning in reading and math over the summer. Everyone who comes will receive free books, and materials to take home to use over the summer.
